

Rail Safe Graffiti Remover - User Guide

Rail Safe Graffiti remover is a fast acting, liquid graffiti remover which safely penetrates and loosens graffiti on pre-finished metal and powder coated surfaces and makes it easy to remove.

It is specifically formulated for the transport industry for use on pre-finished metal, trains and trams, vehicles, buses and powder coated surfaces such as over head doors, colour bonded fencing, post boxes, signal boxes, traffic signs, painted metal surfaces and any other metal surfaces.

(Rail Safe Graffiti Remover is not recommended for rubber and plastic surfaces, Sign Safe or General Purpose Graffiti remover may be more suitable on signs printed with printers ink)

Exterior and Interior Graffiti removal process:

- 1: Put on your protective clothing, safety goggles and gloves
- 2: Check the surface for excess dirt: The surface does not have to be perfectly clean but if there is a lot of traffic film, soot or substantial dirt, it is advisable to clean or power wash this off first.
- 3: Test a small hidden area prior to full application
- 4: **Wet down the surface first with water using a rag or sprayer**
- 5: Shake the product thoroughly to activate it and pour required amount of product onto another rag, sponge or triple 000 wire wool and dab liberally onto the graffiti.
- 6: Let the product activate on the surface for about 60 seconds, then agitate with a rag, sponge or triple 000 wire wool.
- 7: Wash off with water using a new rag.
- 8: repeat steps 4-7 if necessary

Equipment needed

- 1: Rail Safe Graffiti remover
- 2: Safety equipment and protective clothing (chemical resistant gloves, goggles etc)
- 3: Supply of water
- 4: Rags, sponges, triple 000 wire wool, sprayer

Rail Safe Graffiti remover is most effective when used in a “wet Surface” removal process. By “wet Surface process” we are referring to the practice of starting with a water wetted surface and keeping the work surface wet at all times as Rail Safe graffiti remover is applied, it loosens the graffiti and then can be wiped or power washed off.

Results and Benefits

Rail Safe graffiti remover can dramatically reduce the time it takes to remove graffiti, one application is effective at removing 99% of the typical graffiti with no damage to the original underlying surface. It works within minutes and can save significant time, labour and money without the need for additional cost of painting over, repairing or replacing from surface damage sometimes caused by other graffiti removal products.

Coverage

Varies dependent upon type of surface material	0.2 - 0.5 litre/m ²
Wipes	0.1 - 0.3 litre/m ²
